TECHNICAL SKILLS

CYBERSECURITY

- Security Monitoring
- Log Analysis
- SIEM Fundamentals
- Vulnerability Assessment
- Threat Detection
- Incident Investigation

TOOLS

- Wazuh
- Sysmon
- Nmap
- Wireshark
- curl
- Sucuri

SYSTEMS

- Windows
- Ubuntu
- Kali Linux
- DNS
- SSL/TLS
- Web Hosting

PROGRAMMING

- Python
- SQL
- Java
- JavaScript
- MySQL

OTHER

- Git
- GitHub
- VirtualBox

CERTIFICATIONS

- CompTIA Security+ (In Progress)
- Cisco Introduction to Cybersecurity
- Cisco Computer Hardware Basics
- SQL Programming Certification
- RDBMS Certification
- Fundamentals of Python with AI
- Fundamentals of Cloud Computing

EDUCATION

Bachelor of Science in Computer Engineering
Rizal Technological University
2025

RINA S. ARANAS

ASPIRING CYBERSECURITY ANALYST

PROFESSIONAL SUMMARY

Cybersecurity-focused Technical Support Specialist with hands-on experience supporting web hosting environments, troubleshooting DNS, SSL/TLS, email hosting, domain configuration, and website infrastructure. Developed practical cybersecurity experience through labs involving Wazuh, Sysmon, Linux administration, security monitoring, vulnerability assessment, and network analysis. Seeking to transition into a SOC Analyst or Security Operations role.

PROFESSIONAL EXPERIENCE

Web Hosting Technical Support Specialist Nov 2024 – Present
Sutherland Global

- Support DNS, domains, SSL certificates, websites, and email hosting services.
- Investigate website availability, email delivery, and hosting issues.
- Analyze website behavior using browser developer tools and HTTP inspection techniques.

Customer Care Representative Jul 2023 – Nov 2024
Alta Resources

- Resolved customer issues while maintaining documentation and service quality.

IT Intern Jan 2024 – Apr 2024
Inspiro

- Provided Level 1 technical support and Windows system administration assistance.

CYBERSECURITY PROJECTS

Wazuh SIEM Monitoring Lab

Built a lab using Wazuh and Sysmon to monitor endpoint activity and analyze security logs.

Website Security Investigation Lab

Performed DNS, SSL, redirect, and security header analysis.

Java System Monitor

Developed a Java monitoring application for CPU, memory, and disk utilization tracking.

SQL Helpdesk Database

Designed a relational database for IT support ticket workflows.
